

Boloro's authentication solution was featured at the 2nd Annual India Banking Summit and Awards in Mumbai on June 13, 2019.

Boloro's authentication solution was featured at the 2nd Annual India Banking Summit and Awards in Mumbai on June 13, 2019. The event was attended by Key Functional Heads from top Indian banks as well as regulatory bodies, government organizations and FinTechs. The event focused on "The Next Generation of Banking" and Boloro's authentication solution is seen as an ideal way to secure access to online banking and payment validation, as well as all forms of identity verification and activity confirmation. Rajiv Aggarwal, Director of Boloro India, spoke about Boloro's authentication solution, which avoids the Internet and the Operating System and is compatible with all mobile phones. Boloro's ATM-like approach uses what you have (your physical mobile phone) and what you know (your memorized PIN), and separates the authentication process from the actual transaction by using a secure and separate communication channel. Rajiv moderated a session on Digital Payments, attended by high profile bankers, to discuss various challenges and opportunities in the digital payment and banking space. Panel members were unanimous in accepting the need for a review of authentication solutions, considering the obvious issues with biometrics and the impact on consumer confidence due to identity fraud. Boloro Global Limited is proud to be a corporate partner of the India Banking Summit.
